

**MTX** 2014  
Ferragens para Vidro Temperado

The logo features the letters 'MTX' in a bold, red, sans-serif font. The 'X' is stylized with a light blue diagonal stripe. To the right of the 'X' is the year '2014' in a smaller, red, sans-serif font. Below the logo, the text 'Ferragens para Vidro Temperado' is written in a light blue, sans-serif font. The entire logo and text are centered on a white background, which is framed by a red border at the top and bottom.

**NOSSAS DECISÕES  
DEFINEM O ESTADO  
DE ESPÍRITO QUE  
PRETENDEMOS TER**

**ESCOLHA CERTO**

Conte com a parceria da MTX, uma empresa sólida, comprometida com os clientes e que não vai te deixar na mão. Alumínio é um material ecologicamente correto e que oferece inúmeras vantagens.

# NOSSAS CONVICÇÕES REFLETEM NOSSO COMPROMETIMENTO

## A EMPRESA

Há mais de dez anos atuando no setor de ferragens, nossa fábrica conta com sede própria, que está instalada na cidade de Guarulhos/SP. Somos especializados em produção, usinagem e acabamento em alumínio. Dispomos de equipamentos de última geração, oferecendo também a outros segmentos soluções em injeção em peças de alumínio.

## OBJETIVO

*Confecção de ferragens para fixação de vidro temperado. Temos como meta produzir peças que cumpram função decorativa sem perda nos quesitos funcionalidade e segurança. Oferecer ao instalador um visual moderno, limpo e familiar.*

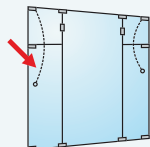

## ALUMÍNIO, O METAL DO FUTURO

Sendo o elemento metálico mais abundante da crosta terrestre, sua leveza, resistência à corrosão e à carga lhe conferem uma multiplicidade de aplicações, especialmente nas soluções de engenharia (inclusive aeronáutica).

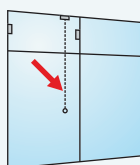

O alumínio pode ser reciclado inúmeras vezes, contribuindo com a preservação do meio ambiente. Todos os itens constantes neste catálogo são produzidos em alumínio predominantemente injetado, ou a partir de extrusão de perfil.

Com o objetivo de garantir a máxima eficiência na hora da instalação e performance na utilização, alguns componentes como parafusos, pinos e afins podem ser produzidos em outros metais de maior dureza.
